

Individuals with Stroke needed for research study

WCMC IRB
Approval Date: 1/12/2017
Expiration Date: 1/11/2018

Individuals with history of stroke are invited to participate in a study using the InMotion2 robot. This study consists of a **single visit** lasting 60-75 minutes assessing arm movements of the shoulder and elbow. Participants will be compensated \$35 for the completed visit. Participants must:

- Be at least 18 years old with a history of stroke and resulting arm weakness
- Be able to follow multiple step directions and provide consent
- Be at least 12 weeks out from last botox injection of the arm
- Be medically stable
- Be able to follow multiple step directions and provide informed consent
- Have a stroke with residual arm weakness

For more information, contact **Ruchi Patel** in the
Rehabilitation Medicine Dept at **212-746-1356**
